

LINE - WALL SERIES

*James*  
LOUDSPEAKER

*“James’ patented AFDC gives you more flexibility to compensate for your room’s acoustics than 99% of the speakers out there.”* Chris Lewis - Audio Editor, Home Theater

PATENTED

At James, design and quality are the priorities: welded aluminum enclosures, proprietary driver technology, and the Adjustable Frequency Distribution Circuit combine to produce the world's finest in-wall speakers

*James In-wall... in a class of its own.*

# SOUND...HANDS DOWN!

*Pure innovation... James Loudspeaker's Adjustable Frequency Distribution Circuit (AFDC) effectively tunes the system to your room.*

*Optimum performance is achieved through each loudspeaker to accommodate different acoustic environments. James' has removed*

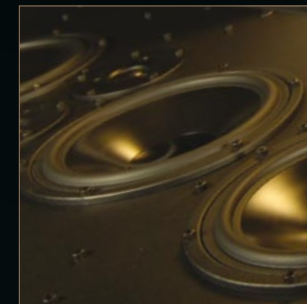

*the need to rate specifications for maximum power handling capabilities because our AFDC protects from high voltage damage.*

*Go ahead and turn it all the way up. Hold onto your seat and let James' sound completely surround you.*

We see what others do not.

At James Loudspeaker we have a vision for excellence in design, and a dedication to every detail.

*Centergy, dual monaural technology provides installation solutions.*

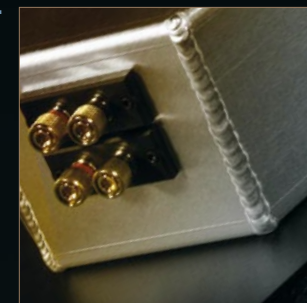

We invest where others do not.

Our engineering standards are unmatched in the industry.

James' finely crafted speakers are the result of enthusiastic designers.

*Welded, aircraft aluminum ensures minimal acoustic internal-resonance.*

We perform like no other.

Real world solutions through the most advanced innovative technology. *Streamlined drivers provide in-wall installations never before possible.*

We are James Loudspeaker.

All James Loudspeaker products are designed by our masterful team with over 182 years of collective experience. *Designed and manufactured in the USA.*

We are driven like no other.

The result...

the epitome of aural perfection. *Enjoy.*

GRAND CONCERTO

# in-ceiling in-wall

James in-wall products offer nearly limitless choice of installation configurations. The discreetly hidden FX series complements any architectural style while the more traditional SDX series has a style of its own. All James Loudspeaker products are timbre matched, resulting in unrivaled audio realism. James, bringing you sounds of life.

VIRTUALLY UNLIMITED CONTROL...ALL AROUND

POWERPIPE SUBWOOFER

Flexible tube allows for multiple port placement options.

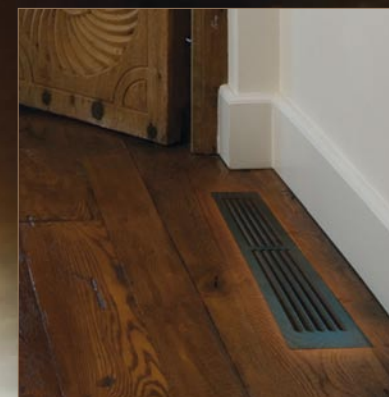

Rubber support straps suspend the PowerPipe between rafters, thus eliminating vibrations.

James' PowerPipe offers a seamless fusion of visionary technology and revolutionary performance. James' PowerPipe bandpass design produces a thunderous performance. With smooth frequency responses and tight transitions, the PowerPipe provides a uniquely spacious soundscape like never before.

*“This is no ordinary in-ceiling product. It produces extraordinary, powerful bass, enough to fill even a large home theater. Most impressive is the PowerPipe’s ability to disappear, both from visual and aural perspectives.”*

Alex Gonzalez - Home Entertainment

POWERPIPE SUBWOOFER  
Architectural Port

The PowerPipe architectural port option is the perfect solution for entertainment system cabinetry, in-ceiling, in-closet, adjoining room, under the floor, or any other location you dream up.
